Ground Floor

	Metric	Imperial
Length	12.900M	43.00FT
Width	7.650M	25.50FT
Height	2.625M	8.75FT
Area	98.685M ²	1096.50FT ²

Feature

In addition to the above area, there is an external terrace along the entire length of the room, accessed through four double doors. The Terrace is 2 Metres wide and has a safety rail. This forms an escape route in the event of emergency evacuation.

Access

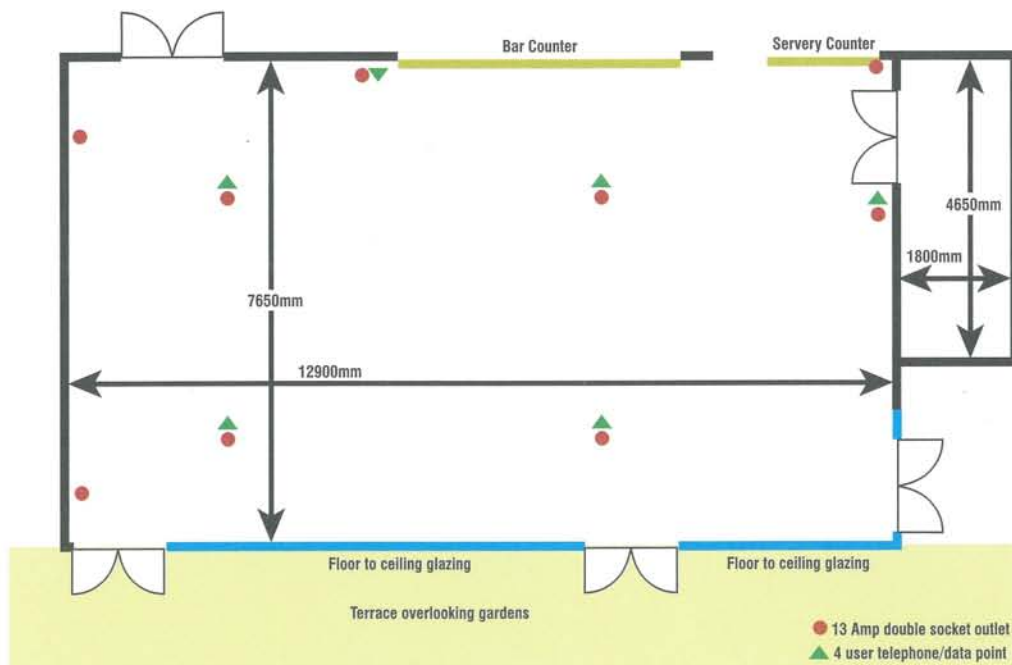

From the Crush Hall/Reception Area through double doors.

Facilities

This room has a bar and a servery area for light catering. There is a dedicated storage area measuring 1.8M x 4.6M with locking doors off the main room.

Services

The room is equipped with data communication cabling with 28 connection points and patch-bay facilities. There are 9 double, 13 amp socket outlets divided over 2 circuits providing a loading capability of up to 6kW. The comprehensive lighting installation consists of a mixture of ceiling tile luminaries and low voltage downlighters divided over a number of circuits allowing variation in lighting levels. Automatic emergency lighting is fitted and emergency exits are always illuminated. The environment is heated by radiators with individual thermostatic valves; temperate air supply and extract ventilation is installed.
